

HIV/AIDS

Vaccines and alternate strategies for treatment and prevention

Register at www.nyas.org/AIDS

This meeting will tackle a range of challenges facing researchers working towards the development of an HIV / AIDS vaccine, and will counter each presented challenge with a possible solution. These challenges include developing HIV vaccines to prevent or control infection, genetic diversity of the virus, and predictive models of infection. The symposium will also cover other (non-scientific) challenges and mechanisms that can be used to reduce HIV transmission now and in conjunction with a future vaccine.

Organizers

Sarah Schlesinger, The Rockefeller University
Yegor Voronin, Global HIV Vaccine Enterprise
Jennifer Henry, The New York Academy of Sciences

Confirmed Speakers

Dan Barouch, Beth Israel Deaconess Medical Center
Alan Bernstein, Global HIV Vaccine Enterprise
Jerome Kim, Walter Reed Army Institute of Research
Julie McElrath, Fred Hutchinson Cancer Research Center
Chris Miller, University of California, Davis
Louis Picker, Oregon Health & Science University
Sanjay Phogat, IAVI
Harriet Robinson, GeoVax Inc.
Michael Worobey, University of Arizona
Susan Zolla-Pazner, NYU Langone School of Medicine
Additional speakers to be added as confirmed

Presented by the **Global HIV Vaccine Enterprise**, and the **Vaccine Science Discussion Group** at the **New York Academy of Sciences**.

Sponsored by **NeED Pharmaceuticals**.

**MAY
19**
9:00 AM-
5:00 PM

Registration

All Members: \$10
Non-Member (Corporate): \$65
Non-Member
(Academic/Non-Profit): \$45
Non-Member
(Student/Postdoc): \$25

Location

The New York
Academy of Sciences
7 World Trade Center
250 Greenwich St, 40th Fl
New York, NY 10007
